

RNS Announcement

25 August 2026

AIM: SYN

Cambay PSC Update

Synergia Energy Limited (**Synergia** or the **Company**) announces the following update regarding its Cambay PSC (WI 50%) in India.

Cambay PSC production update

Following the workover of the C-19z, C-64 and C-74 legacy wells, a program to tie in associated gas via a newly constructed in-field pipeline network to the C-73 gas export facility has been completed.

For the last 3.5 years, gas has been produced and exported from the C-77H and C-73 wells.

Currently, associated gas from the C-19z and C-64 wells is being co-mingled with the long-term C-73 and C-77H gas wells, with a total gas production of 124 Mscfd as of 23 August 2026. It is anticipated that this will rise to circa 200 Mscfd when the associated gas from the C-74 well is brought online over the coming days.

The associated gas from the C-08 well has yet to be tied in.

This announcement contains inside information for the purposes of Article 7 of the Market Abuse Regulation (EU) 596/2014 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 ("MAR") and is disclosed in accordance with the Company's obligations under Article 17 of MAR.
